GOOD TIMES ARE COMING IN MINES

Sentiment in the Financial Centers Turning Slowly to the Industry.

WILDCATTING IS DEAD

Investors Have Reached a Point Where They Do Their Own Thinking.

A well-known Salt Lake mining man has returned from a professional visit to various important business and financial the country, and se said Thursday that while there remained some prejudice against mining, this feeling was growing less and less. There ing was growing less and less. There stock, the market value of which was has been a vast change in sentiment during the past six months, he said, and with money to invest had actions: while peole with money to invest had not overlooked the results of the wild orgy of wildcatting that flourished prior to the 1907 panic days, they were beginning to appreciate that miming offers opportunities when properly conducted that no other industry presented To The Tribune he said:

The average investor is hard to approach on a mining proposition. The industry has not escaped the muckraker, which was the logical result of the wild campaign of illegitimate promotion of a few years ago. I found people realizing the difficulties of mining, yet they know at the same time how generous are the results when success once is achieved.

Investors Are Thinking.

Investors Are Thinking.

Investors are liable to size up a new proposition today much more intelligently than ever before, and in this lies the most encouraging outlook for western mines. The next movement forward will be more of a business nature, and the man with the legitimate prospect willing to give the public a fair show will find little difficulty in acquiring financial assistance.

Developing the average mine is becoming more difficult as the years go by for the reason that the ground is pretty well covered and the new proposition is more likely to be distant from facilities. The average investor is beginning to appreciate what distance from a railroad means. He is beginning to study the physical as well as geological conditions. He wants to know whether the ore likely is milling or shipping in character, and if there is a known process for bandling the ore should it prove refractory.

When one considers the expense of developing a prospect, of the risks taken under the most favorable circumstances, whether ore can be marketed once it is found, the railroad and smelting rates, and the thousand other items of expense and risk incident to the business, taking all this into consideration in view of the natural suspicion the east holds re-

Advice to Those Who Have Lung Trouble

Have Ling Trouble

Tuberculosis is said to be curable by simply living in the open air and taking an abundance of fresh eggs and milk Do all you possibly can to add to strength and increase weight; eat wholesome, nourishing food, and preathe the cleanest and purest air, and then if health and strength do not return, add the tonic and beneficial effects of Eckman's Alterative Read what it did in this case;

405 E 5th St., Wilmington, Del.

"Gentlemen In January, 1908, I was taken with hemorrhages of the lungs My physician, one of the leading practitioners, said that it was lung trouble. I look eggs and milk in quantities, but I got very weak. The doctors said I would not gain in weight as long as I stayed in the store; but I kept on working and prayed each day that I might get well. I believe my prayers were answered, for Mr. C. A. Lippinhoott, my employer (Lippincott & Co.) Deparment Store, 306 to 314 Market street, Wilmington, Del.) had learned of a remedy called Eckman's Alterative that bad done great good, and upon his recommendation I began taking it at once. This was about June, 1908, I continued 'aithfully, using no other remedy, and finally noticed the clearing of the lungs. I firmly believe Eckman's Alterative saved my lecovery as being miraculous."

I make this statement so that others may learn of the wonderful merits of Eckman's Alterative is effective in Bronchitis, Asthma, Hay Fever, Throat and Lung Troubles and in upbuilding the system. Does not contain poisons, oplates or habit forming drugs. For sale by Schramm-Johnson Drugs, "The Never-Substitutors," Five (6) Good Stores, and other leading druggists. Ask for booklet telling of recoveries, and write to Eckman Laboratory, Philadelphia, Pa. for additional evidence. (Advertisement.)

garding mining, it readily is seen that the more straightforward are the business principles involved landled the more chance one stands of getting help. For a year or more past men of means have been reluctant to finance anything. The whole world has been under suspicion, but the clouds are clearing away one by one, slowly but surely, and there is no getting round the fact that it is easier to get an audience today than six months ago.

No Boom Probable.

No Boom Probable.

I look for no insane mining boom, no indiscriminate promotions and financing, no inspiring hope of millions by the mere display of an enormously rich ploked sample of ore. I look also for the investor to see to it that the money he puts up will go into the ground honestly. We are entering upon an investment era, not one of speculation. It will be an era of ore finding and not one of shoving wildcat stocks upon an unsuspecting public. The public is not unsuspecting any more. The nation-wide determination to get back to a same and legitimate basis of transacting business covers mine financing also, but it is going to be an ideal period for the real miner, the real developer of mines.

PRICES HOLD WELL ON LOCAL 'CHANGE

There was no special change Thursday on the local exchange, except that trad-ing was dull. Price ranges remain the same, and the Tintic issues are in the lead. Ohio Copper is holding its own. There were sales for 32,000 shares of stock, the market value of which was \$2260.

General Manager Ernest Bamberger reports that the principal operations at the property were carried on by the Mines Operating company, whose lease expires in February, 1921. This lease covers certain portions of the mine above the 900-foot level. In addition to receiving royalties and rentals from the Mines Operating company, the Ontario received without cost 50,000 shares of Mines Operating company stock, which has 680,000 shares issued.

Operations of Year.

The Ontarlo company began work last October in old stopes on the 1500 or drain tunnel level, where, it is believed considerable ore was left when the No. I drain caved some years ago. Progress at this point is slew, but enough ore has been mined and shipped to meet the expense of the work, and this portion of the mine should be opened up within a few months. Old raises have been opened from the 1500 to the 1400 and from the 1400 to the 1300 levels, showing some ore. A raise is being driven from the 1300 to the 1200, where another ore body is said to have been left.

The following paragraph of the report will be of interest:

"The property of the Park City Light. Heat and Power company, all of the stock of which is owned by the Ontario Silver Mining company; the power plant situated near the mouth of the drain tunnel No. 2 certain transmission lines, etc., and the portion of the water flowing from the Ontario drain tunnel No. 2 owned by your company, having recently been sold to the Utah Power and Light company for the sum of \$180,000, reservation has been made of sufficient water for any future milling purposes, and an agreement has been made with the Utah Power and Light company affording us a favorable contract for all power requirements. As the field of operations of the Park City Light, Heat and Power company was necessarily limited, and as the Park City Light, Heat and Power requirements. As the field of operations of the Park City Light, Heat and Power company was necessarily limited, and as the porteo effered was ample, it was thought advisable to make this sale."

Assets of Company.

ALL BULLFROG MAY FEEL NEW. IMPETUS

Bringing Merger Tramp Many Old Pocket Books Out of Hiding Places.

Special to The Tribune GOLDFIELD. Nev., Mar. 6 .- The possi-24,920 bility of a "comeback" on the parties is 57,031 some of the leading Builfrog issues is Total \$7,347,738 presaged by the projected operations of the Sunset Mining & Development com- tain Mining company by the s pany, a merger of the Tramp Consoll- of the interior in the matter of a dated, Bullfrog Sunset and Denver Bullfrog Annex companies and incorporated Mining company with the commi

on the assessable stock basis. It is stated that the stockholders of these companies have responded so liberally that the new company will have upwards of \$60,000 in cash with which to develop its properties.

Much Ore Exists.

When the Bullfrog stocks were a factor in the mining share market, Tramp Consolidated was one of the leaders, selling to well above \$2 a share and ranking next in the district to Montgomery Shoshone Consolidated. The projectors of the Sunset merger have been having the mines thoroughly sampled during the past two or three months, under the direction of an eminent engineer, with the result that a large tonnage of low and medium grade milling ore has been found in the old workings, particularly in the Tramp mine.

in the old workings, particularly in the Tramp mine.

No great depth has been attained in working this ground, all development having been confined to tunnel work and raises above the tunnel level. The Tramp and Denver shafts are now to be sunk to depth and the adit continued to connect the two main workings. The manager states that the sampling has disclosed large bodies of low grade ore, varying from four to thirty-six feet in width, with assays ranging from \$2 to \$20 per ton. Some ore of much better grade is found, but only breaking averages are considered.

Low Production Cost.

Plans are being figured on for a mill of large capacity and elaborate tests of the ore indicate that the product can be treated for a milling cost of \$1 per ton and mined for a fike amount. It is estimated that a profit can be recovered in handling ore averaging \$4 per ton. There is an ample supply of water and electric power can be installed at simall cost. All the ore exposed is free milling and can be treated by the cyanide process. The treatment estimates are on a basis of handling 5000 tons monthly, and it is designed to erect a plant of at least this capicity and one that can be doubled in capacity as required by adding to the original plant.

That the Montgomery Shoshone mill was not a success is regarded by mining men generally in this section as the fault of the mill equipment and not of the mill epuipment and not of the beginning of extensive operations by this merser company, it is probable that the beginning of extensive operations by this merser company, it is probable that there will be a resumption of work at other points in the Bullfrog district.

An Epidemic of Coughing is sweeping over the town and young and bid are alike affected. Foley's Honey and Tar Compound is a quick, safe, reliable family medicine for Plans are being figured on for a mill

Honey and Tar Compound is a quick, safe, reliable family medicine for coughs and colds. A. S. Jones of Lec Pharmacy, Chico, Calif., says: "Foley's Honey and Tar Compound has no equal. and I recommend it as containing no narcotics or other harmful properties." Schramm-Johnson, Drugs, "The Never-Substitutors," Five (5) Good Stores.

DECISION IS GAINED BY ROUND MOUNT

A very important decision has rendered in favor of the Round filed by the Round Mountain of the land office at Washington & issuance of patent for the Great We

issuance of patent for the Great We Froup of claims belonging to the Mountain Mining company.

This decision is presumed to a very important bearing on the gation between John F. Davideo. Sphinx company and the Round tai Mining company for the resum the apex rights flowing out of the Western No. 1 claim and now are to the Round Mountain Mining compay yirtue of this decision almost up, if not quite, covers all ground is pute.

ly, if not quite, covers all ground is pute.

The litigation between Davidson the Round Mountain Mining on has covered a period of our bavidson was a lessee operating a Black Hawk lode claim under a acquired prior to the purchase claim by the Round Mountain in company. The Round Mountain is company in its own operations had lowed the Les Gazabo vein to a within the lines of the Black Haw claim and extracted ore which I son subsequently claimed under a filed in the Nye county district and upon which he obtained a first for \$165,600.

From this judgment the Round is still pending in the Nevada succourt.—Goldfield Tribune.

Merited Leadership

222222222222222222

Utah-Idaho Extra Fine Beet Sugar has been accorded the place of leadership solely on merit.

A person does not have to be intimately acquainted with the various processes by which it is produced to fully realize how vastly superior it is. It "speaks for itself."

The finest cane sugar ever produced does not surpass it.

Housewives now realize that it pays to be particular when buying sugar, and call
